EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

IN THE SPECIFICATION:

At page 1, at the beginning of the specification, after the title, insert the following in order to update the continuing data:

"This application is a divisional of U.S application No.09/110,052, filed July 3, 1998, now abandoned."

2. The following is an examiner's statement of reasons for allowance: Applicant's argument filed 10/31/05 is persuasive specifically at pages 11-12.

The cited prior art does not teach or suggest the process of producing an electrode configuration including the step of preventing the breaking through of the electrode during over etching of the electrode configuration due to the different depths of the contact holes by applying the second electrode on the first electrode as defined in claims 1 and 23-24.

Whereas, the closest prior art Watabe teaches a process of forming electrode configuration, wherein breaking through is prevented by controlling or adjusting the size of the contact holes.
